

Cloud Computing Standards - A NIST Perspective

Robert Bohn, PhD
Advanced Network Technologies Division

28 January 2016
Cloud Standards Coordination - ETSI
Brussels, Belgium

NIST's Goal

To accelerate the federal government's adoption of cloud computing

- *Build a USG Cloud Computing Technology Roadmap*
- *Lead efforts to develop standards and guidelines*

The NIST Cloud Computing Program

Public Working Groups

Standards

Outreach

- Develop fundamental concepts in cloud computing
 - Develop international standards with SDOs
- Address Requirements from USG Trust Cloud Computing Technology Roadmap
 - Commerce
 - Innovation
 - Collaborate w other Govt Agencies
 - Speaking Events

USG Cloud Computing Technology Roadmap Requirements (NIST SP 500-293)

1. International voluntary consensus-based standards
2. Solutions for High-priority Security Requirements, technically de-coupled from organizational policy decisions
3. Technical specifications to enable development of consistent, high-quality Service-Level Agreements
4. Clearly and consistently categorized cloud services
5. Frameworks to support seamless implementation of federated community cloud environments
6. Updated Organization Policy that reflects the Cloud Computing Business and Technology model
7. Defined unique government regulatory requirements and solutions
8. Collaborative parallel strategic “future cloud” development initiatives
9. Defined and implemented reliability design goals
10. Defined and implemented cloud service metrics

The NIST Cloud Computing Program

Standards

With the International Organization for Standardization (**ISO**) and the International Electrotechnical Commission (**IEC**)

Foundational

Vocabulary & RA (17788, 17789)

Continuing

SLAs - 4 part (19086)
Interoperability/Portability (19941)
Data & Data Flow (19944)

Reference Architectures (RA) and Vocabularies

- **NIST SP 800 – 145 (The NIST Definition of Cloud Computing)**
- **NIST SP 500 – 292 (NIST Cloud Computing Reference Architecture)**
- **ISO/IEC 17788:2014/ ITU-T Y.3500 (08/2014) (Cloud Computing Overview and Vocabulary)**
- **ISO/IEC 17789:2014/ ITU-T Y.3502 (08/2014) (Cloud Computing Reference Architecture)**

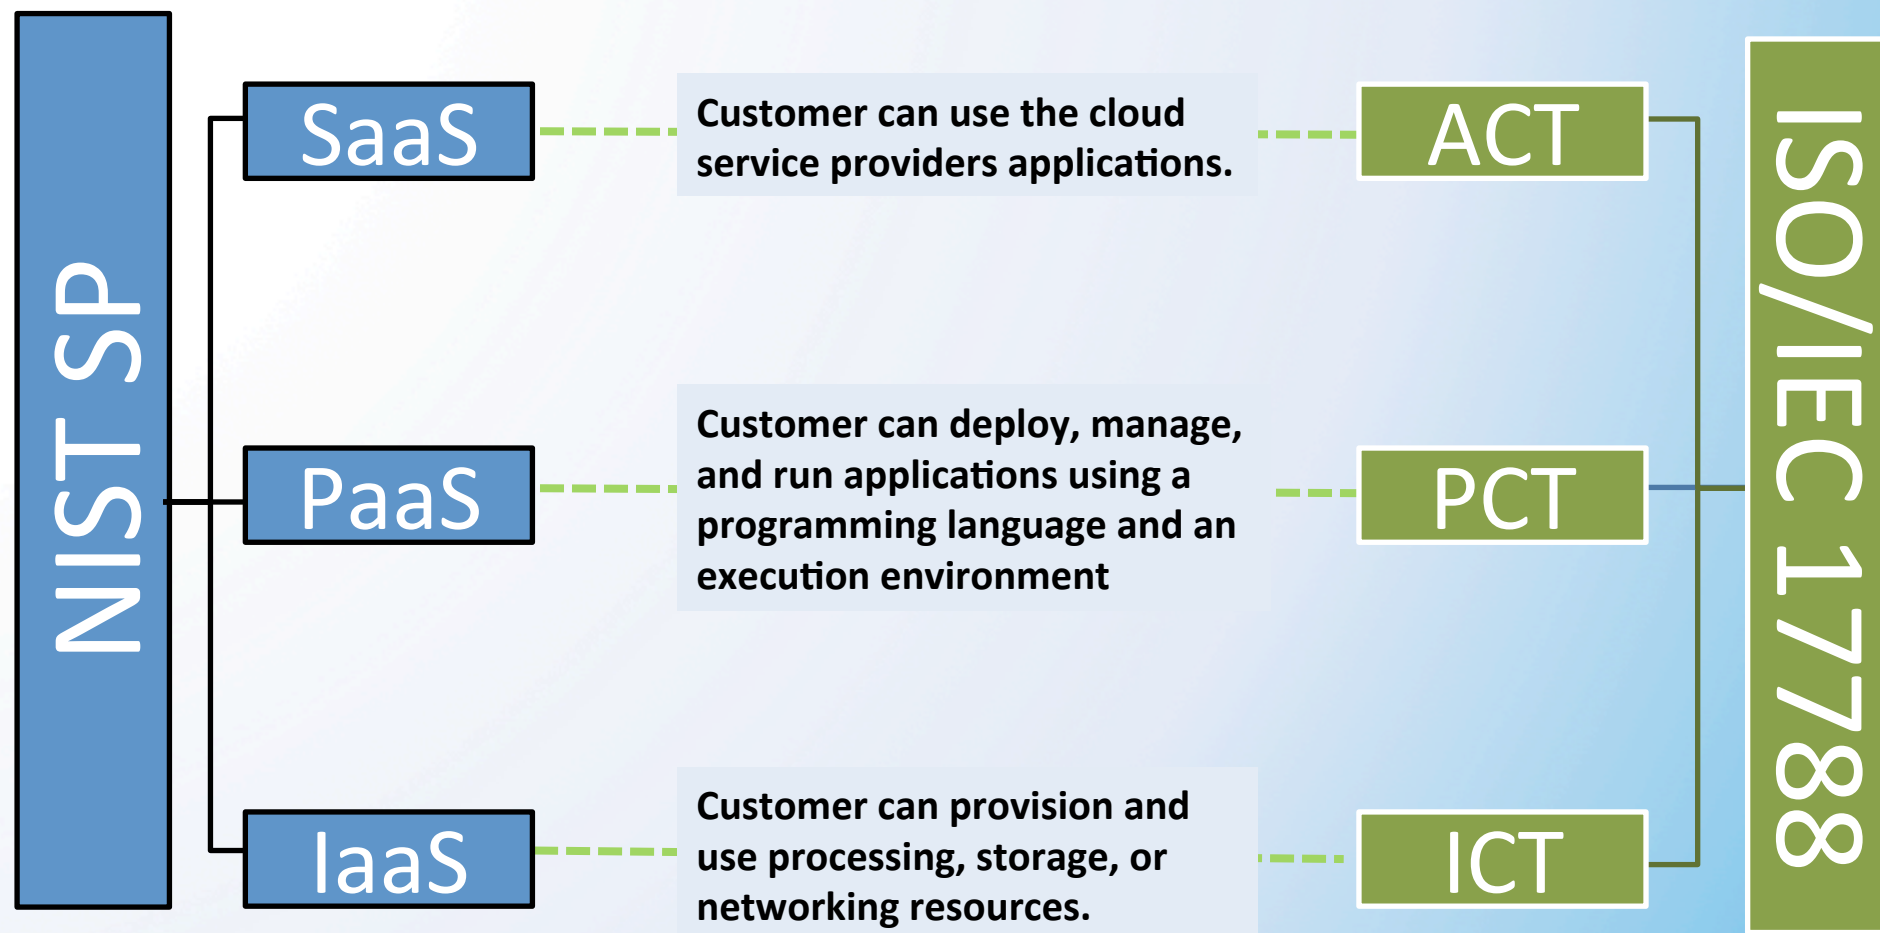

Free copies of ISO/IEC standards are located at:
(<http://standards.iso.org/ittf/PubliclyAvailableStandards/index.html>)

Vocabularies and Overview

The 17788/Y.3500 is largely interchangeable with the NIST documentation, but for a few caveats...

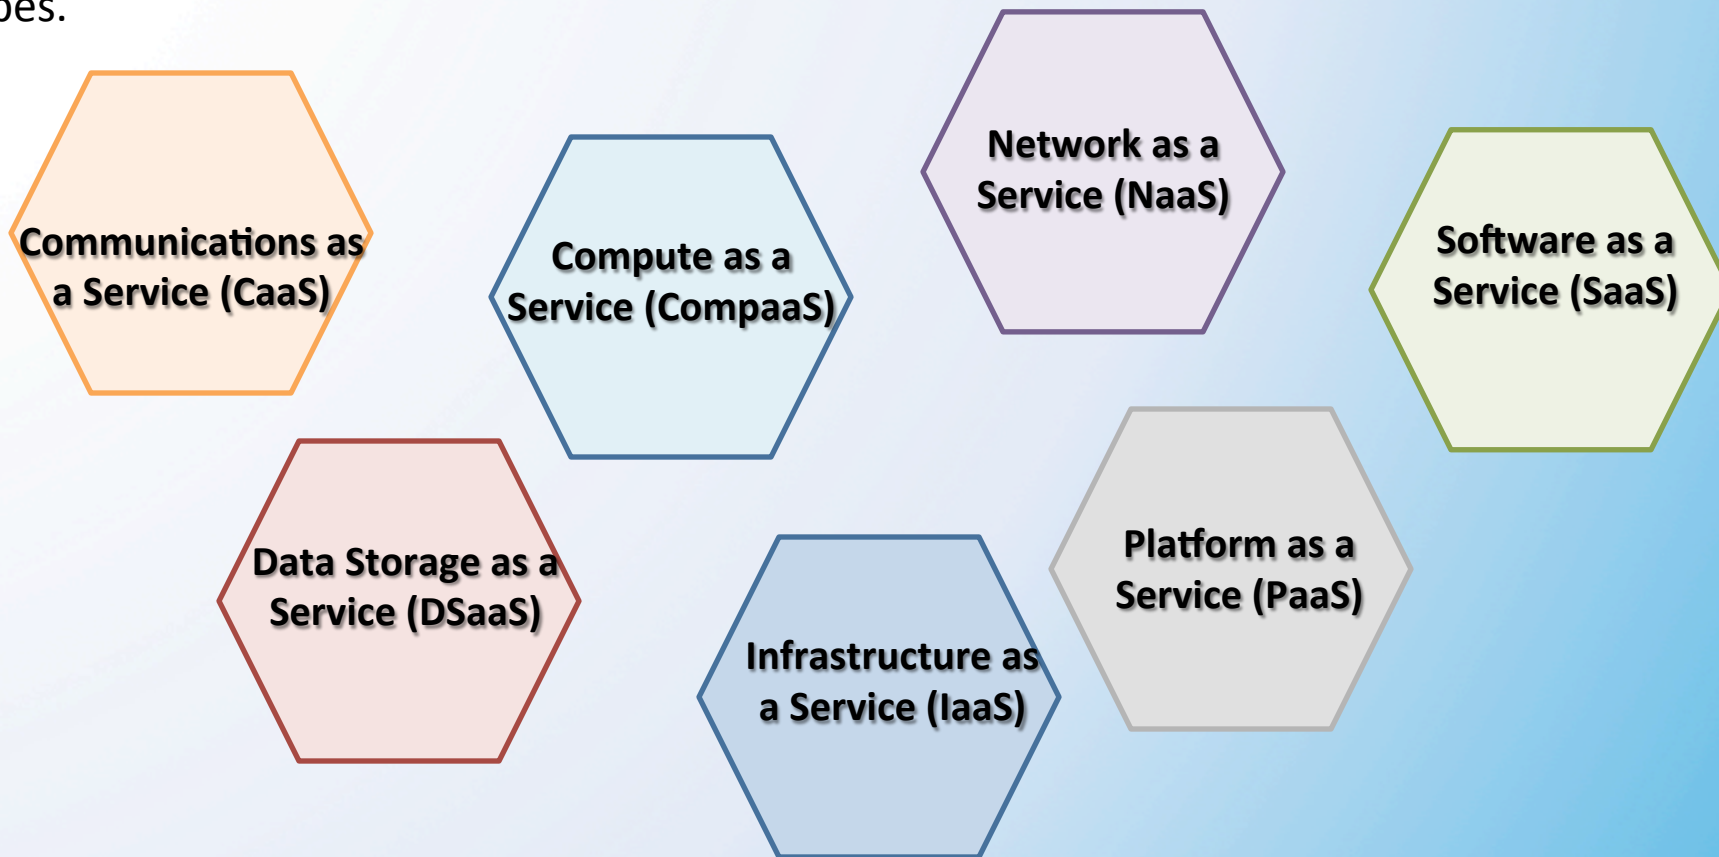

- Renaming of SaaS, PaaS, and IaaS.
- Introduction of Service Categories
- Reduction of Cloud Roles from 5 to 3.
- Expansion and addition of new terms and concepts
- New Scope of Hybrid Clouds

Service Models & Capability Types

Service Models and Service Categories

A cloud service category is a group of cloud services that possess some common set of qualities. A cloud service category can include capabilities from one or more cloud capabilities types.

Service Models and Service Categories

This table shows the relationship of the cloud service categories and cloud capabilities types

Cloud Service Categories	Cloud Capabilities Types		
	Infrastructure	Platform	Applications
Compute as a Service	X		
Communications as a Service		X	X
Data Storage as a Service	X	X	X
Infrastructure as a Service	X		
Network as a Service	X	X	X
Platform as a Service		X	
Software as a Service			X

Cloud Key Characteristics

NIST

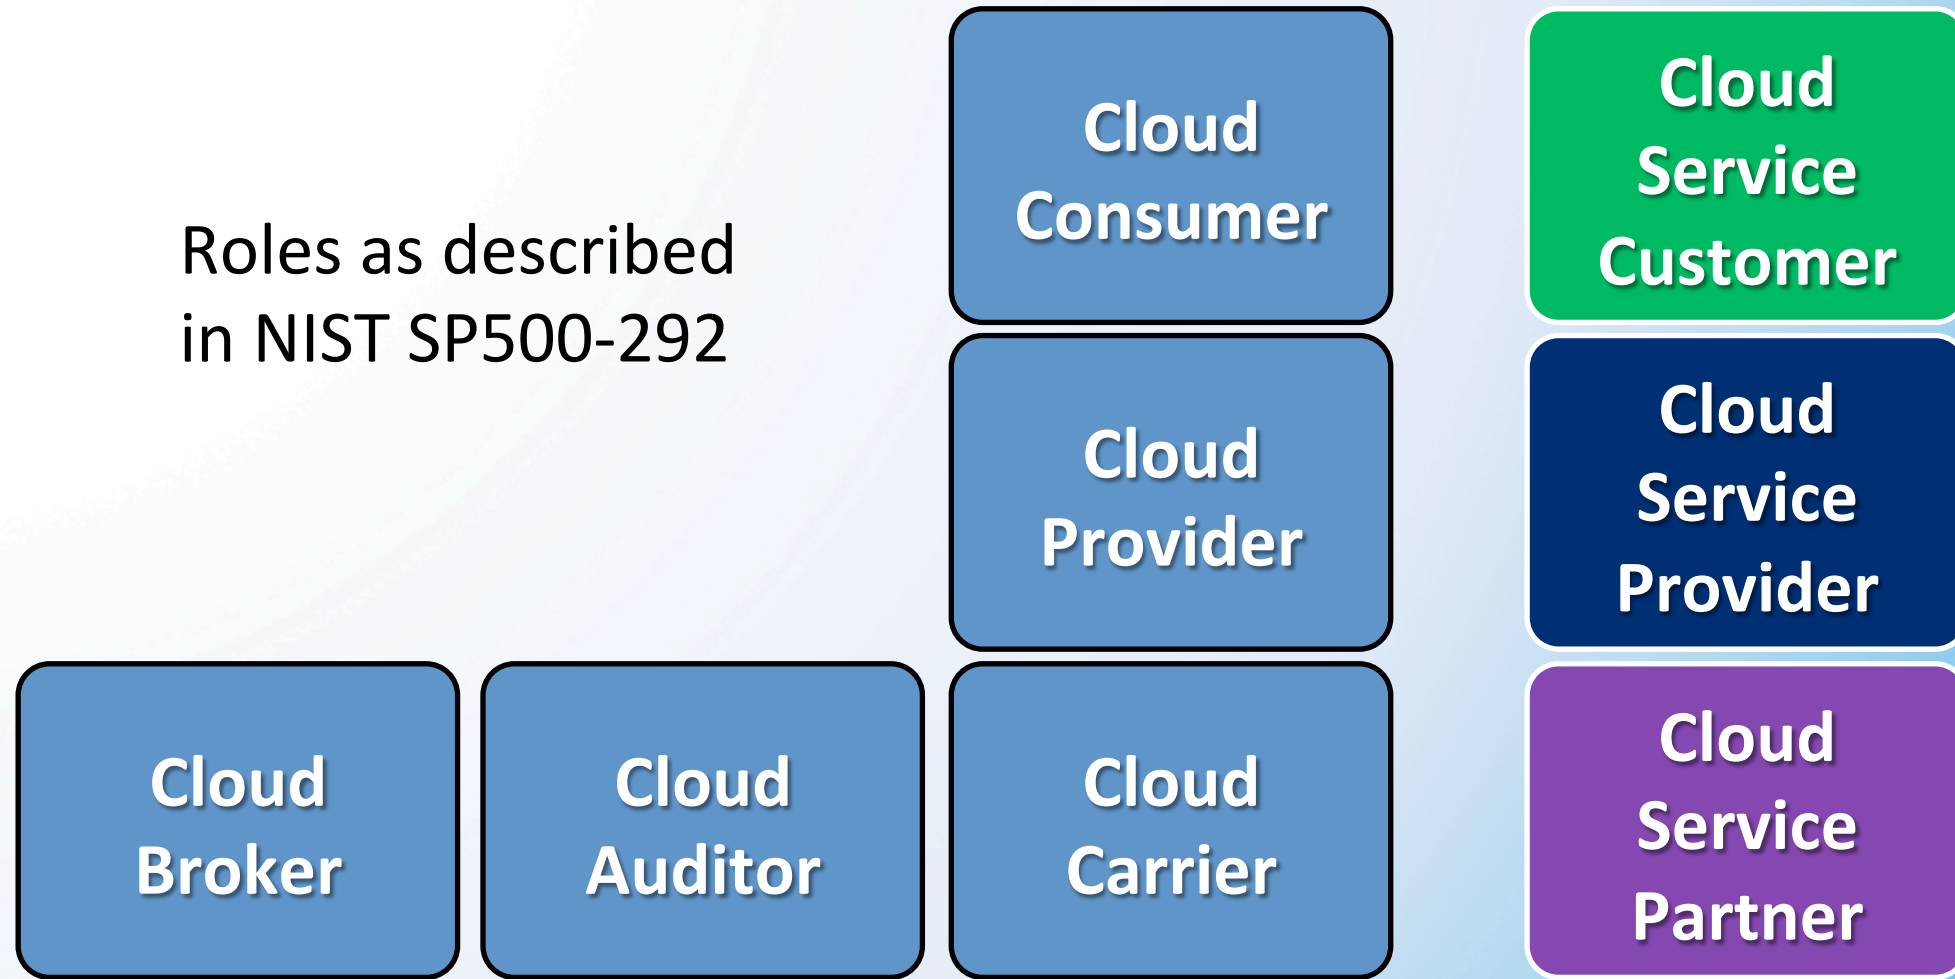

- On demand self-service
- Broad network access
- Resource pooling
- Rapid Elasticity
- Measured service

ISO 17788

- On-demand self-service
- Broad network access
- Resource pooling
- Rapid elasticity and scalability
- Measured service
- Multi-tenancy

Roles

Roles as described
in NIST SP500-292

Hybrid Cloud

NIST

A hybrid cloud is a composition of **two or more clouds** (on-site private, on-site community, off-site private, off-site community or public) that remain as distinct entities but are bound together by standardized or proprietary technology that enables data and application portability

ISO 17788

- Uses at least **two different cloud** deployment models
- Hybrid clouds represent situations where interactions between two different deployments may be needed but remained linked via appropriate technologies. As such the boundaries set by a hybrid cloud reflect its two base deployments.

Service Level Agreement Frameworks

Current Standards Progress

- **ISO/IEC DIS 19086-1** (DIS Ballot)
Part 1: Overview and concepts
- **ISO/IEC NP 19086-2** (Working Draft)
Part 2: Metrics
- **ISO/IEC CD 19086-3** (Committee Draft Ballot)
Part 3: Core conformance requirements

DIS – Draft International Standard
NP – New Project
CD – Committee Draft

Stages of ISO Standard Development

ISO/IEC 19941: WD - Interoperability & Portability

- ***Establishes common terminology*** for use in understanding concepts of interoperability and portability to facilitate a common understanding
- ***Defines types of interoperability and portability*** in cloud computing & in cloud capabilities types: ACT, ICT, PCT
- ***Describes models for interoperability and portability***

ISO/IEC 19944: CD Data and their flow across devices and cloud services

- ***Describes the various types of data flowing in the cloud computing ecosystem*** and the impact of connected devices on the data that flow within the cloud computing ecosystem.
- ***Extends the existing cloud computing vocabulary and reference architecture*** to describe an ecosystem involving devices consuming cloud services.
- ***Identifies the categories of data*** that flow across the cloud service customer devices and cloud services in order to help cloud service customers understand and protect the privacy and confidentiality of their data through increased transparency of policies and practices.
- ***Provides a formal scheme*** for cloud service providers to declare use statements for the various data types which are processed by their cloud services, which provide transparency concerning the handling of data.

Future of Cloud Standards

- Dynamic Seamless integration between clouds
- InterCloud – Federated Clouds – Cloud of Clouds
- Not every CSP has every service
- Library of Cloud Services, Shared Services
